

# Deep Learning in Physics

## Kickoff Lecture

15.04.2024

Björn List, Patrick Schnell

Holl et al. (2020)

A Input weather state

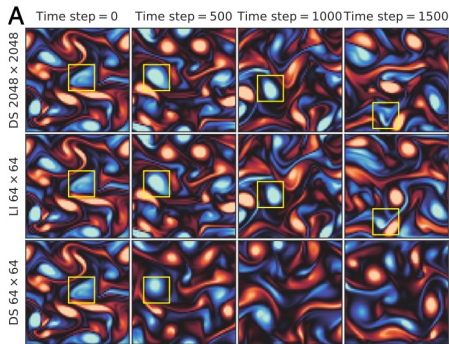

B Predict the next state

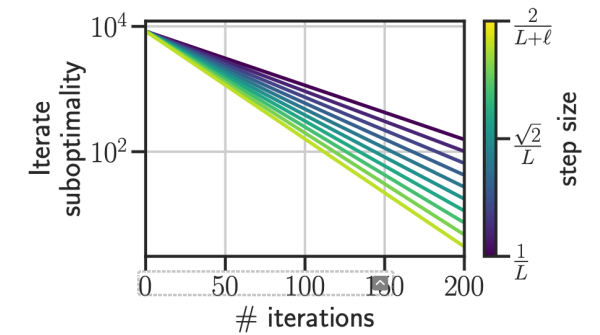

Brandstetter et al. (2022)

Lam et al. (2022)

Scieur et al. (2022)

Kochkov et al. (2021)

# About this Seminar

- Recent research topics in **deep learning for physics**
  - **Architectures**
  - **Learning algorithms**
  - **Applications**
- Familiarize yourself with the **underlying physics & ML applicability**
- Students conduct **independent analyses** of the topic and related work
- Develop writing & presentations skills
- Submission: Presentation slides, report

# Presentation

## Slides:

- Any style you like, **submit as PDF**
- **Follow guidelines** (text-balance, visualizations, highlighting etc.)
- Feedback on semi-final slides provided by advisor

## Presenting:

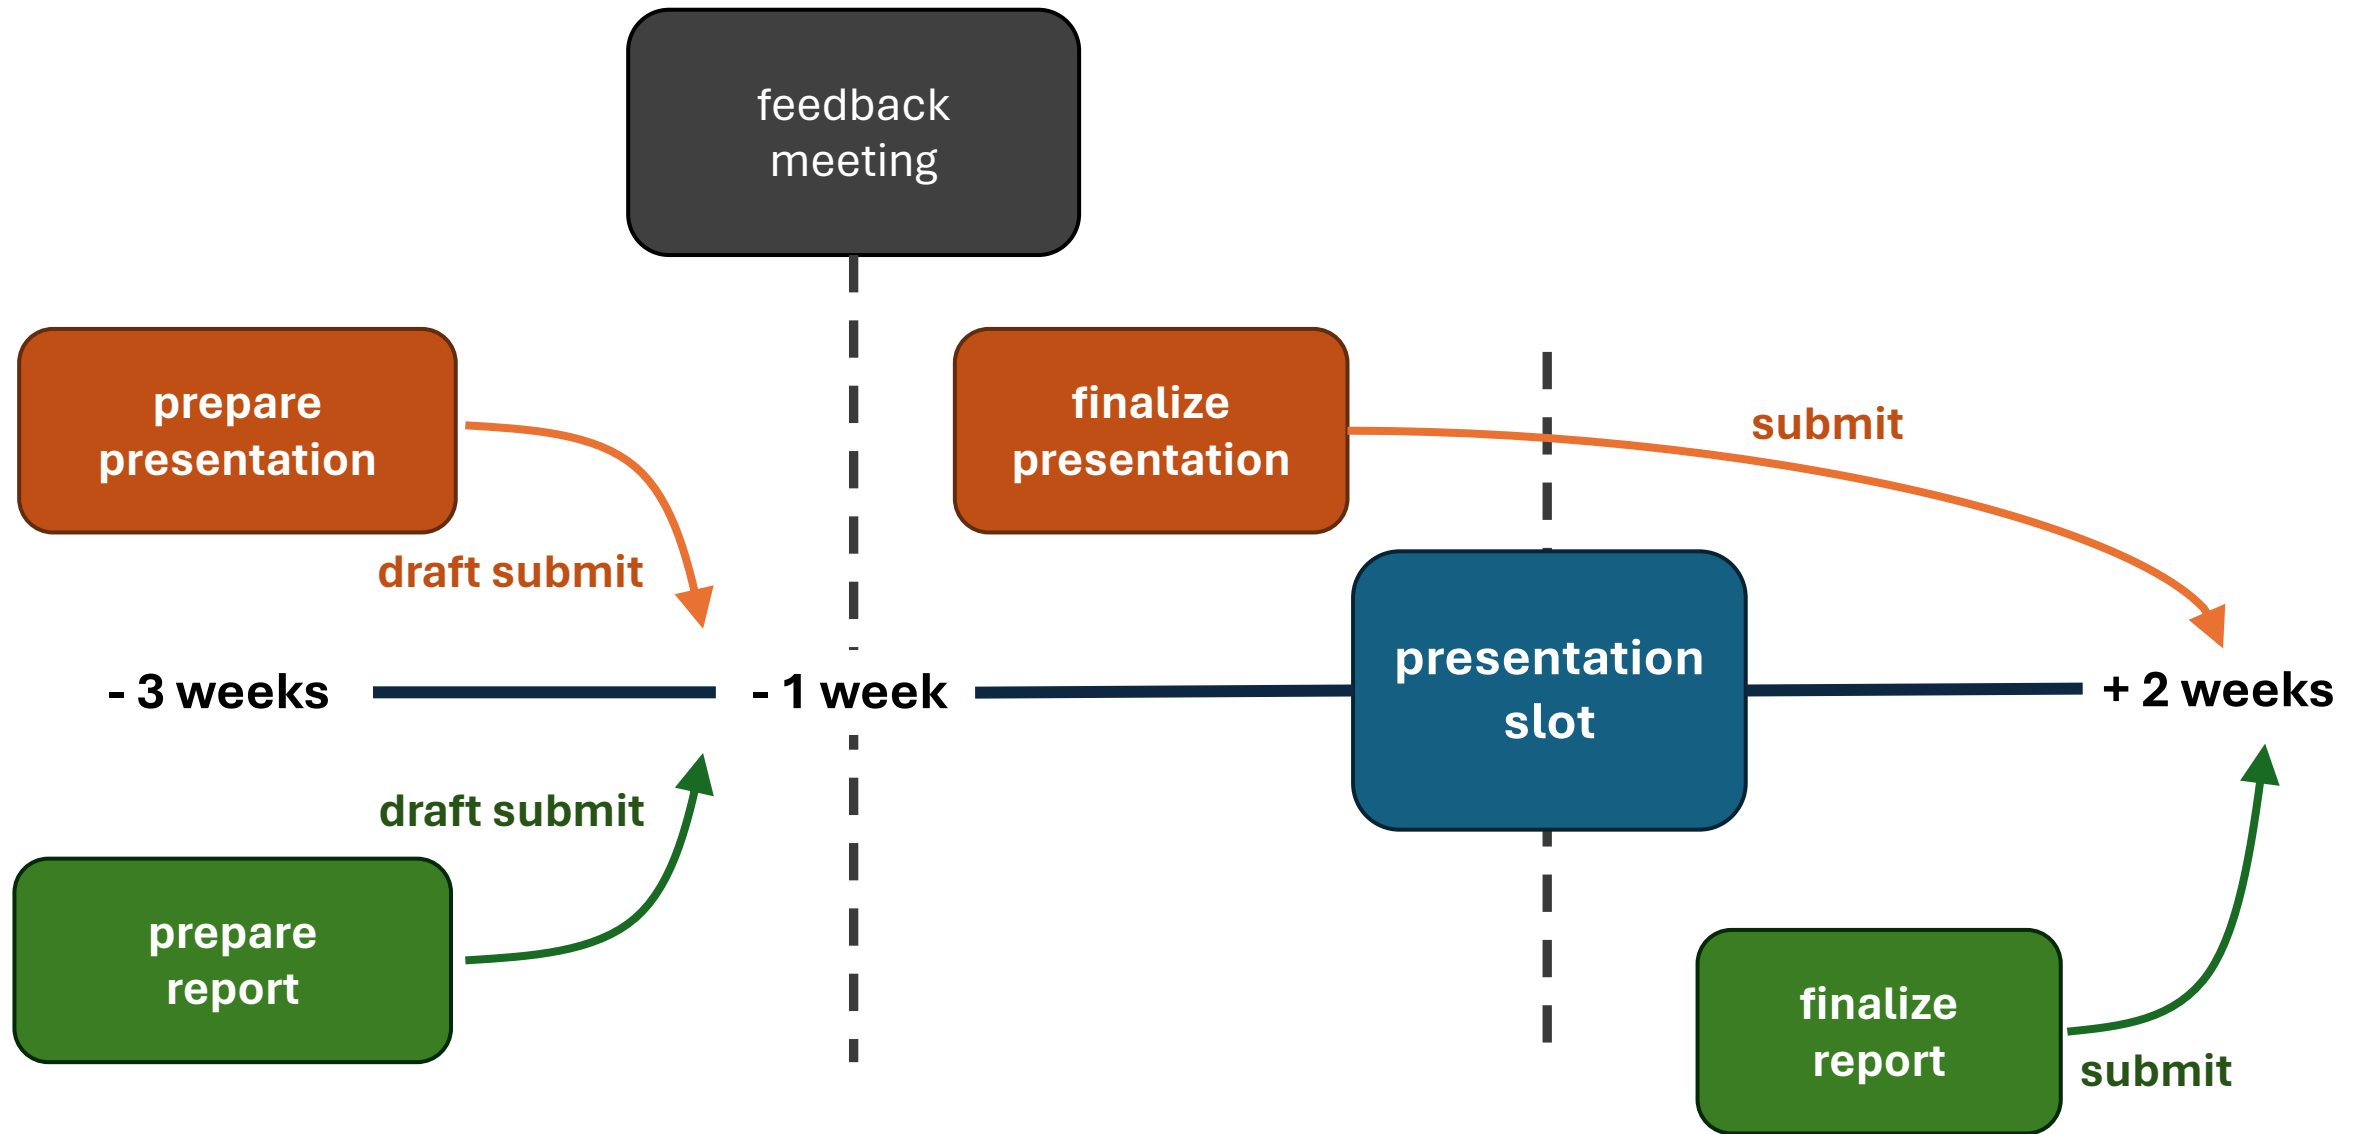

- Present in **English**
- Target **25 min** for presentation, **10 min** for questions
- **Test your setup beforehand** (laptop/projector)!
- Tips for a good presentation: [DocTUM: How to give a great scientific talk](#)

# Report

- Maximum 4 pages
- ACM SIGGRAPH TOG format (acmtog) [available online](#)
- Guideline
  - Start with a **summary of the paper**
  - **Own thought and reasoning** should be the main focus
  - Example: comparison to literature, pros & cons, future work...
- Feedback provided by advisor, final version due **after** talk

# Your Timeline

# Additional Resources

All information is available on [the website!](#)

## Background Reading:

- Book: Hastie et al., [The Elements of Statistical Learning](#)
- Book/Online: Goodfellow et al., [Deep Learning](#)
- Online: Nielsen, [Neural Networks and Deep Learning](#)
- Online: Thuerey et al., [Physics-based Deep Learning](#)

# Additional Information

- TUMonline registration is handled by us, you do not need to sign up
- Advisor:
  - Assigned to you in advance (see website)
  - Contact your advisor **1 week before** your presentation at the latest
- Attendance:
  - Missing **one session** is allowed, let us know in advance and write a short summary of the papers (ca. 1 page)
  - Missing **another** session means failing the seminar (special rules for severe issues as appropriate)

# Grading Criteria

## Presentation

- Good explanations
- Knowledgeable
- Clarity
- Stage performance

## Slides

- Design, text density
- Citations
- Highlighting
- Visualizations

## Report

- Base summary
- Literature review
- Own judgement

## Other

- Own experiments
- Participation in discussions

**Any questions?**
